Naoya Chujo

Guest Editor of Thirty-seventh Issue of International Journal of Informatics Society

We are delighted to have the Thirty-seventh issue of the International Journal of Informatics Society (IJIS) published. This issue includes selected papers from the Twelfth International Workshop on Informatics (IWIN2020), which was held online, Sept. 10-11, 2020. The workshop was the fourteenth event for the Informatics Society, and was intended to bring together researchers and practitioners to share and exchange their experiences, discuss challenges and present original ideas in all aspects of informatics and computer networks. In the workshop 24 papers were presented in seven technical sessions. The workshop was successfully finished with precious experiences provided to the participants. It highlighted the latest research results in the area of informatics and its applications that include networking, mobile ubiquitous systems, data analytics, business systems, education systems, design methodology, intelligent systems, groupware and social systems.

Each paper submitted to IWIN2020 was reviewed in terms of technical content, scientific rigor, novelty, originality, and quality of presentation by at least two reviewers. Through those reviews 17 papers were selected for publication candidates of IJIS Journal, and they were further reviewed as a Journal paper. We have three categories of IJIS papers, Regular papers, Industrial papers, and Invited papers, each of which were reviewed from the different points of view. This volume includes five papers among those accepted papers, which have been improved through the workshop discussion and the reviewers' comments.

We publish the journal in print as well as in an electronic form over the Internet. We hope that the issue would be of interest to many researchers as well as engineers and practitioners over the world.

Naoya Chujo received his B.E. in applied physics, M.S. in information science and Ph.D. degrees in electrical engineering from Nagoya University in 1980, 1982 and 2004. He joined Toyota Central R&D Labs. in 1982. He has been a professor at the Department of Information Science, Aichi Institute of Technology since 2010. His research interests are in the area of embedded system and automotive electronics. He is a member of IEEE, IPSJ, IEICE, IEEJ, and Informatics Society.
